

## Visit to Agastya Invention Pvt. Ltd. By CReSES Students

Faculty and students from the Centre for Renewable and Sustainable Energy Studies (CReSES) recently visited Agastya Invention Pvt. Ltd., a leading manufacturer and trader of domestic and portable biogas storage tanks, water storage bags, and bladder tanks for waste management. This industry visit provided students with a unique opportunity to witness innovative solutions in sustainable energy and water management. They learned about the design, production, and application of biogas storage systems and water storage technologies. The visit was an eye-opening experience, enhancing their practical knowledge and understanding of real-world applications in renewable energy and sustainable practices.
