

## **Industrial Visit to NICCO Engineering Service Limited**

Postgraduate (PG) Students, PhD research scholars, and esteemed faculty members from Centre for Interdisciplinary Sciences (CIS) of JIS Institute of Advanced Studies and Research (JISIASR) visited NICCO Engineering Services Limited (NESL) on May 15<sup>th</sup> 2024 to experience an industrial live processes and production units, along with best management practices. NESL mainly deals with fabrication of customized online leakage shilling products with diverse compositions, Belzona protective coating, Valtest technology, Spiral welding, clam design.

NESL also extends expert services to solve extensive industrial leakage problems and coating requirements. It was a very informative visit to enrich the practical knowledge for both the students, research scholars, and faculty members. JISIASR team had a direct interaction with the technical and production unit of NESL. The students visited the characterizations and testing labs. All the staffs and workers of the company are very humble and supportive. Warm hospitality extended from the manager and staffs of NESL is highly appreciated. Overall, this visit will open up a new horizon for collaboration between NESL and JISIASR on several aspects of research on advanced materials and their applications in near future.
